Agreement With NASCAR for Driver's Eye

This morning, Racing Force announced a new contract for its Driver's Eye technology with the NASCAR Cup Series.

After several tests over the past few months, the Racing Force Group finally announced the deployment of its Driver's Eye technology in the NASCAR Cup Series. This time the agreement also includes a broadcaster: FOX Sports.

The NASCAR Cup Series is the largest and most-watched championship in the United States, with an average of more than 3,500,000 viewers for the 2022 season, up 4% from the previous season. As the championship celebrates its 75th anniversary this year, it will offer an innovative new way for fans to watch the races.

This new exposure for the Driver's Eye fits perfectly with the group's strategy to export its technology to other disciplines.

No financial details were offered in the group's press release.

We are reiterating both our Buy rating and TP of €6.3.

This research report (the “Report”) has been approved by Midcap, a business division of TP ICAP (Europe) SA (“Midcap”), an Investment Services Provider authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (“ACPR”). By issuing this Report, each Midcap analyst and associate whose name appears within this Report hereby certifies that (i) the recommendations and opinions expressed in the Report accurately reflect the research analyst’s and associate’s personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst’s or associate’s compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst or associate in the Report.

Methodology

This Report may mention evaluation methods defined as follows:

1. DCF method: discounting of future cash flows generated by the company's operations. Cash flows are determined by the analyst's financial forecasts and models. The discount rate used corresponds to the weighted average cost of capital, which is defined as the weighted average cost of the company's debt and the theoretical cost of its equity as estimated by the analyst.
2. Comparable method: application of market valuation multiples or those observed in recent transactions. These multiples can be used as references and applied to the company's financial aggregates to deduce its valuation. The sample is selected by the analyst based on the characteristics of the company (size, growth, profitability, etc.). The analyst may also apply a premium/discount depending on his perception of the company's characteristics.
3. Assets and liabilities method: estimate of the value of equity capital based on revalued assets adjusted for the value of the debt.
4. Discounted dividend method: discounting of estimated future dividend flows. The discount rate used is generally the cost of capital.
5. Sum of the parts: this method consists of estimating the various activities of a company using the most appropriate valuation method for each of them, then realizing the sum of the parts.

Conflict of Interests

D. Midcap or any related legal entity is a market maker or liquidity provider with whom a liquidity agreement has been entered into in respect of the Issuer's financial instruments: Racing Force SpA

F. Midcap or any legal entity related to it is party to any other agreement with the Issuer relating to the provision of investment services in connection with the corporate activity: Racing Force SpA

G. Midcap and the Issuer have agreed to the provision by the former to the latter of a service for the production and distribution of the investment recommendation on the said Issuer: Racing Force SpA
